Challenge

In particular, simplifying invoicing was our biggest concern. We had to simplify our invoicing concept significantly, make it smarter and thus more secure. In addition, we wanted to be able to run evaluations – if possible at any time.

Solution

Lexolution and Lexolution.BI Cube. This has not only simplified invoicing, but we have also illuminated and revised our processes. We wanted time savings and the ability to work successfully with a small back office team. We are lean and wanted to make that visible in the handling of our processes.

Benefit

The time savings we can realize in the STP-supported areas are enormous. The law firm management software Lexolution is smart and the secretariats can work more easily. The introduction of Lexolution.TIME has made time recording easier and faster for colleagues. Lexolution has increased our internal communication - at all levels and especially between secretariats. Efficiency has been fundamentally increased and this is also reflected in the motivation of the employees. With the introduction of Lexolution and the BI Cube, we have the possibility to get an immediate impression of the success of the office at any time and can pick up on developments early on and thus actively control them. Transparency gives us security and the knowledge that we are economically successful. In addition, we definitely produce less paper.
