

To **RA Micro** and back.

*Simple, practical, clear - some of the advantages of
Winmacs over RAMicro*

RISTER • WULF & PARTNER
RECHTSANWÄLTE

Challenge

Actually, the law firm and its staff were always very satisfied with Winmacs. Nevertheless, they switched to RA Micro. The trigger for the change to RA Micro was a new colleague. He insisted on the change, because RA Micro would map the daily processes even better and would offer a larger range of functions anyway. The partners of the firm trusted these statements and made the switch. Relatively soon after the switch, it became obvious that this was not the right decision for the law firm. Rister, Wulf & Partner would have preferred to switch back to Winmacs after a few weeks. Unfortunately, this was not possible due to the contract terms.

Solution

After the contract expired, the law firm switched back to Winmacs. All data was migrated from RA Micro to Winmacs without any problems. The migration was done overnight. The following morning, all workstations were equipped with Winmacs and all employees had access to all data. After all, the software and its benefits were already known.

Result

The program structure of Winmacs is simply much more practical and clearly designed. Users can always call up almost any function directly from the currently open file without having to switch to other parts of the program. This makes working very pleasant and saves lawyers and REFAs a lot of time in their daily work. In addition, Winmacs runs much faster even with large amounts of data - loading times are practically non-existent.

Switching to RA Micro showed us how valuable Winmacs was and is for us. Now we are back and absolutely convinced of the practical, fast and user-friendly software.
